

## Tech Specs

# A700 Rocket®

### Size (mobile)

#### Length

3.0m

#### Width

0.9m

#### Height

1.4m

### Capacity

1,400 litres / week of mixed organic wastes (approx 700 kg / week)

Food waste capacities: Up to 700 litres / week (350kg) or 2,100 litres / week when used with MASSerator & Dewaterer (Sold separately)

### Carbon Footprint Reduction Potential

409 Tonnes CO2 equivalent per year can be saved by composting using this Rocket® to compost organic wastes

### Motor

0.75kWh

### Heater

2 x 0.85kWh Thermostatically controlled

### Power Requirement

240-volt, Single-phase, standard plug socket

### Power Consumption

26kWh per week (Average)

### Heater Element

0.85kWh Thermostatically controlled

### Temperature Recording

4 channel temperature recorder and software

### Ventilation

Optional (available on request at time of order)

### Housing Requirement

Under cover on hard standing (non-porous)

### Equipment Options

MASSerator and Dewaterer packages to increase capacity to 2,100 litres of food waste per week

Power sieve for refining end product increasing product usage

Garden waste chipper, various types available
