

Tech Specs

A900 Rocket®

Size (mobile)

Length

4.0m

Width

1.0m

Height

1.6m

Capacity

3,500 litres / week of mixed organic wastes (approx 1,750 kg / week)

Food waste capacities: Up to 1,750 litres / week (875kg) or 5,250 litres / week when used with MASSerator & Dewaterer (Sold separately)

Carbon Footprint Reduction Potential

1,023 Tonnes CO₂ equivalent per year can be saved by composting using this Rocket® to compost organic wastes

Motor

0.75kWh

Heater

2 x 1kWh Thermostatically controlled

Power Requirement

240-volt, Single-phase, standard plug socket

Power Consumption

30kWh per week (Average)

Temperature Recording

4 channel temperature recorder and software

Ventilation

Supplied as standard

Housing Requirement

Under cover on hard standing (non-porous)

Equipment Options

Automated capability available to meet increased capacity

MASSerator and Dewaterer packages to increase capacity to 5,250 litres of food waste per week

Power sieve for refining end product increasing product usage

Garden waste chipper, various types available
